Obesity in childhood is increasingly being recognised as an epidemic, and urgent action is being called for to address it. This book results from a European study to identify the amount of robust data available to describe childrens nutritional and physical activity behaviour in each European country. It comprises two parts. Part 1 looks at the relevant necessary information for monitoring childrens behaviour, based on measures identified in scientific reports, and proposes sets of population-based and policy-based indicators for nutrition and for activity. Part 2 reports the relevant data currently available in each European country. ISBN 9783456848648 Sprache: Deutsch Gewicht in Gramm: 290.
