POLYMER INJECTION SHEET METAL FORMING - EXPERIMENTS AND MODELING

Shaker Verlag Jul 2013, 2013. Buch. Book Condition: Neu. Neuware - Polymer Injection Forming (PIF) is a new production technique to manufacture plastic-metal hybrid components. The most distinctive advantage of the PIF-process is that the injected polymer melt can be simultaneously used as a pressure medium to form the sheet metal blank. Contrary to the conventional hydroforming process, the pressure and temperature in PIF process are non-uniformly distributed. To predict the forming behavior in PIF, it is essential to have knowledge...
